Dual-Embossed, Wood Grain Finish For a Beautiful Deck

Our OPTIMA Dekk profiles bring the beauty and functionality of ArmorCap science in a new era of manufactured decking. Manufactured with our DuxxBak composite that was created to overcome the issues presented with wood and PVC-based composite decking materials so you can defy the elements proven to be the enemy of traditional outdoor products.

Optima Dekk uses American-made, rapidly-renewable materials. It will not rot, as our composite contains no wood filler to break down with environmental exposure. And because of its patented blend of BioDac®, rice hulls, and virgin High Density Polyethylene, it is naturally resistant to the effects of mold and mildew.

Your Slip-Resistant Poolside Solution
